---

## Step-by-Step Process

---

### Step 1: Purchase Complete ✓

You've already completed this step! Your payment of \$6,995 is now held securely in Afternic's escrow account. **The seller cannot access these funds until you confirm receipt of all 8 domains.**

**What happens next:**

- Afternic sends you a confirmation email
- You'll receive transfer instructions for wildbuy.com
- Seller is notified to begin the protective domain transfers

---

### Step 2: Afternic Transfers wildbuy.com

**Timeline:** 24-48 hours from purchase

**What to expect:**

#### 1. Transfer Initiation Email

- Afternic will email you with transfer instructions
- You may need to accept the domain transfer at your registrar
- Check your spam folder if you don't see the email

#### 2. Domain Registrar Actions

- If you have a registrar account (GoDaddy, Namecheap, etc.), you'll receive a transfer approval email

- Click the approval link or log into your registrar to accept
- If you don't have a registrar yet, Afternic will guide you through creating one

### 3. Transfer Completion

- Once accepted, the domain transfers within 24 hours

**What to expect:**

  - Your registrar name (e.g., "Namecheap", "GoDaddy")
  - Your registrar account email or username

- Accept each transfer through the links in the emails

#### 4. Verification

- Log into your registrar account
- Verify all 7 protective domains appear in your domain list

# Frequently Asked Questions

---

## What if I don't receive the transfer emails?

**Check your spam folder first.** Transfer emails often get filtered. If you still don't see them after 24 hours, contact Afternic support or the seller directly.

## Can I use the domains before the transfer is complete?

**No.** You cannot modify DNS settings or use the domains until they're fully transferred to your account and you have management access.

## What if one of the 7 protective domains doesn't transfer?

**Do not confirm receipt in Afternic.** Contact the seller immediately at [dave@GeniusNoteSystem.com](mailto:dave@GeniusNoteSystem.com). Your payment is held in escrow until you confirm all 8 domains are in your account.

## How do I provide my registrar information securely?

### Only provide:

- Your registrar name (e.g., "Namecheap")
- Your registrar account email or username

### Never provide:

- Your password
- Credit card information
- Personal identification documents

## What happens if there's a problem?

**Your payment is protected.** If any domain fails to transfer or there's an issue, contact Afternic support immediately. They will hold your payment until the issue is resolved. You can also request a full refund if the transfer cannot be completed.

## **Do I need to renew the domains immediately?**

**No.** All domains come with their existing registration period intact. Check the expiration dates in your registrar account and set up auto-renewal to avoid losing the domains in the future.

## **Can I transfer the domains to a different registrar after purchase?**

**Yes.** Once all 8 domains are in your account, you can transfer them to any registrar you prefer. However, most registrars require domains to remain with them for 60 days after an incoming transfer before allowing another transfer out.
